Fuji Red Apple

4-6 foot seedling, Semi-dwarf—\$24 each

With its sweet/tart flavor, the Fuji Red apple is a favorite fresh eating apple that is crisp, firm, and juicy. Boasts beautiful red-colored skin and is medium in size. Produces large yields that ripen late in the season. Reaches 12-15 feet at full maturity. Not drought tolerant, may require watering. Not self-pollinating, will require accompaniment of a complementary fruit tree for optimal fruit production. Pruning will also aide in production.

Granny Smith Apple

4-6 foot seedling, Semi-dwarf—\$24 each

Large, tart, multipurpose apple ideal for baking, eating, apple sauce, and apple juice. Fruit is crisp and sour/tart with green skin. Tree reaches 12-15 feet at full maturity. Not drought tolerant, may require watering. Not self-pollinating, will require accompaniment of a complementary fruit tree for optimal fruit production. Pruning will also aide in production.

Bartlett Pear

4-6 foot seedling, Semi-dwarf—\$25 each

A prime eating, canning, and baking fruit. Pears will keep well in colder, dry conditions. Tree grows at a faster rate and does best in full sun. Not drought tolerant, may require watering. Not self-pollinating, will require accompaniment of a complementary fruit tree for optimal fruit production. Pruning will also aide in production.

Size—Seedling Variety—Price per tree	Quantity	Price Due
4-6' - Granny Smith Apple—\$24		
4-6' - Red Fuji—\$24		
4-6' - Bartlett Pear—\$25
